

Five years. Tens of thousands of lives.
And one choice this mom will never regret.

"Seeing my baby on ultrasound made me look at my pregnancy in a different way. I mostly remember seeing his teeny, tiny heart beating so fast. It was real and it was in me!"

—Lee King, Memphis, Tenn.

Five years ago, Focus on the Family® launched the Option Ultrasound™ Program—a groundbreaking initiative providing grants for ultrasound machines and sonography training to pregnancy medical clinics across the country. As a result, tens of thousands of mothers like Lee have chosen life for their babies—and haven't looked back. Join us in celebrating all God has done in the past five years—and all He has planned for the future.
